- CSS

LANGUAGES

- English | Advanced
- Spanish | Native

EXPERIENCE

FULL-STACK DEVELOPER　　　　　　Oct 2022 – Present
Petrofac | Leiden, Netherlands

- Creation of an ERP based on .NET Blazor dedicated to user management, in which I perform Front-End and Back-End tasks.
- Application developed from scratch based on the latest version of .NET Blazor and using a non-relational database in Azure CosmoDB.

FULL-STACK DEVELOPER　　　　　　Sep 2021 – Oct 2022
FormeID | Cologne, Germany

- Development and maintenance of an ERP developed in Angular 13 and .NetCore 6 and the database in SQL Server.
- Development of hybrid applications in Xamarin, both for IOS and Android.

FULL-STACK DEVELOPER　　　　　　Sep 2020 – Sep 2021
Gestión Tributaria Territorial | Alicante, Spain

- Company collaborating with the Public Administration dedicated to the development of web applications for citizen management.
- Company in which I have acquired knowledge of both Front End (xml, html) and Back End (SQL, Oracle, C#, WCF, JavaScript) and version control through Git.

FUL-STACK DEVELOPER　　　　　　Sep 2018 – Feb 2019
Actio | Alicante, España

- Actio is a consulting firm specialising in the development and implementation of business management software solutions.
- Company in which I was trained in Back End languages (TypeScript, C#, MySQL, Rest (API), Front End (HTML, CSS) as well as several projects in Angular.

EDUCATION

DEGREE IN COMPUTER ENGINEERING　　　　　　Sep 2014 – 2020
University of Alicante | San Vicente, Alicante

Bachelor's degree in Computer Engineering (Software specialisation)

COMPUTER ENGINEERING　　　　　　Jan 2018 – Jun 2018
Gdansk University of Technology | Polonia, Gdansk

Erasmus studies in Computer Engineering where I acquired a great ability to communicate in English and knowledge about software encryption, Java applications and other technologies.

PROJECTS

N1+

- Winner of the contest of the University of Alicante against gender violence, with recognition from the Diputación de Alicante.
- Made in Ionic, Angular and MySQL and developed for both mobile platforms (Android and IOS) and its corresponding web application in .NET.
- Currently the application belongs to the University of Alicante, which continues to develop it under the name of Seguras, as an innovation project against gender violence.

Foodapet

- Multiplatform e-commerce for the sale of pet products.
- Made in Ionic for the mobile part (IOS and Android) and .NET for the web part.
- Use of NoSQL database (Firebase).

CERTIFICATES & COURSES

- Completion of a Java and SQL course in which I received knowledge about advanced parts of this language such as JPA, Spring, Spring Batch, Java EE, Mockito and code testing with JUnit and Selenium.
